

HSLSL Presentation Practice Studio Equipment

The soundproof studio is equipped with a podium, wall-mounted LCD panel, video recording equipment, a Microsoft Surface, lighting, microphones, and a video editing PC.

To save a presentation, be sure to bring your own storage device, such as a laptop, SD card, or flash drive. Consider 8GB for a 40-minute presentation; 16GB for 80 minutes; and 32GB for about two hours' worth of footage.

The computer workstation with video/audio editing software includes the following:

Adobe Creative Cloud Suite, including:

- Premiere Pro – video editing software
- After Effects- processing/effects
- Photoshop- still image editing software
- Illustrator- vector graphic creation
- Audition- Audio editing software
- Media Encoder- Video conversion

Open Source software available includes:

- Avidemux – video editing software
- VirtualDub- video capture software
- Blender- 3D creation software
- Handbrake- video encoding software
